### **Notes:**

The sites to be visited are either those where it is difficult to see the full site from public viewpoints, thereby necessitating accompanied access to the land, and/or where specialist evidence was given which the Inspector wishes to inspect on site. In all cases the Inspector will wish to see all relevant aspects of the site, not just the specialist interest.

All parties who accompany the Inspector on these visits are reminded that he will not hear additional evidence about the proposed allocation. The purpose of the visit is to enable him to see the physical features of the site and its surroundings, including matters discussed at the hearings.

The Inspector will make unaccompanied visits to the sites not included in the above list.
